## SUMMARY

Product Designer with 2+ years of experience designing customer-facing AI products end-to-end. Skilled in interaction and visual design, responsive prototyping, design systems, user research, and evidence-based UX evaluation. Experienced translating research and requirements into clear product flows and developer handoffs in Figma, with a focus on consistent, accessible customer experiences.

## SKILLS

**Design & Research:** UX/UI Design, Product Design, Interaction Design, Visual Design, Product Thinking, Design Strategy, Wireframing, Low & High-Fidelity Prototyping, Responsive Design, Mobile-First Design, Design Systems, Component Libraries, Design Tokens, Information Architecture, Accessibility (WCAG 2.1), User Research, Usability Testing, User Interviews, Moderated Testing, Affinity Mapping, Journey Mapping, Persona Development, Participatory Design, Mixed-Methods Research, Heuristic Evaluation, A/B Testing, Conversion Optimization, Customer Onboarding, Customer Research, Data-Driven Design, Omnichannel UX, End-to-End Product Flows, UX Writing

**Tools:** Figma, FigJam, Figma Dev Mode, Framer, Adobe XD, Miro, Figma AI / AI-Assisted Design, Tableau, Power BI, Jira, Notion

**Technical:** Vue.js, HTML, CSS, React (basic), REST API Integration, Frontend Development, Design-to-Code, Developer Handoff, Production Handoff, Agile/Scrum, Cross-Functional Collaboration, AI Product Design, AI Evaluation

**Certifications:** Foundations of Project Management, Project Planning & Initiation, Python for Everybody

## WORK EXPERIENCE

### TasteMakers

Sep 2026 - Present

*Product Designer, Design Systems*

*Design consultancy focused on design systems and AI-related design initiatives.*

- Contribute design systems expertise to AI-related product design initiatives, applying design tokens, component hierarchy, and visual consistency principles.
- Collaborate cross-functionally to uphold design quality and consistency standards across deliverables.
- Bring product design and design-systems experience from prior AI product work to a consultancy-based engagement.

### Hirello.ai

Nov 2025 - Sep 2026

*Founding Product Designer*

*AI-driven career platform focused on interview preparation and job search accountability.*

- Owned product design across end-to-end product flows for our AI career platform, creating user flows, wireframes, and interactive prototypes in Figma for web and mobile experiences.
- Led onboarding optimization by running A/B tests across 6 different flow variations. Identified top performers that increased completion rate by 18% and reduced user drop-off by 30%.
- Conducted customer research with 12+ users to uncover onboarding friction points and validate design decisions. Translated research insights into design changes that improved feature adoption by 14%.
- Collaborated with marketing and product teams to align customer insights with design strategy. Facilitated design workshops, presented findings and recommendations, and used clear written rationale to ensure the team understood customer needs.
- Built and maintained a Figma component library, ensuring consistent UX across mobile and web while enabling the team to ship faster.
- Thrived in a fast-paced startup environment with ambiguity and rapid iteration, making confident decisions based on customer feedback and shipping polished experiences quickly.

### UMBC - Human-Centered Computing Research

Mar 2025 - Jun 2025

*Product Designer*

- Led participatory design research with 11 graduate students, applying mixed-methods UX research through surveys, user interviews, and contextual observation to surface AI usage patterns, evaluate user needs, and synthesize actionable design decisions.
- Redesigned an AI tool interface in Figma from first principles, embedding 12 co-designed AI policies into the UX and demonstrating how interaction design decisions can operationalize institutional values.

### Wipro

Feb 2022 - Jan 2023

*Web Development Team Lead*

*Global IT services and consulting company delivering enterprise-scale digital products and technology solutions.*

- Translated ambiguous stakeholder requirements into user flows, UI specifications, and product workflows; partnered with engineering and QA on production handoff to reduce post-release defects by ~30% and fix turnaround by ~20% through structured documentation and collaboration.

## EDUCATION

### University of Maryland, Baltimore County

Jan 2024 - Dec 2025

*Master of Information Systems, Information Systems*

- GPA: 3.74
- Coursework: Human-Centered Computing, UX Research, Product Management, Information Architecture, Data Visualization

### Dr. Babasaheb Ambedkar Technological University

Jun 2018 - Aug 2022

*Bachelor of Technology, Computer Engineering*

- GPA: 3.4
